THE LONDON PRESS ON THE PEACE. The Morning Post contends that the soul of the Treaty agreed upon is the Nationality guaranteed under every variety of local government in a Confederation of the Italian States. The Emperor of Austria is to be King of Venetia solely as an internal member of the Confederation; he will rule less than 3,0,0,0,00. The Pope is shorn virtually of his temporal supremacy; he is deprived of the substance, but keeps the shadow. The Imas says that Venice must hope that her independence will not be a mere name, and that the influence of France and Austria united will not be more unbearable than that of Austria singly. The Romans must hope that the Italian Confederacy under the honorary presidency of the Pope, will be nothing like any Government they have hitherto known. The Papal States are left as they were, but with a master somewhat greater than before; he is bonorary President of the Italian Confederacy at the side. The King of Naples is made a member of the Confederation, and has to learn the worth of that honor and its import. Europe has to welcome a new power—the Italian Confederacy to week the confederation, and has to learn the worth of that honor and its import. ber of the Confederation, and mas to learn use worth of that henor and its import. Europe has to welcome a new power—the Italian Confed-eration, older in dignity if not in time. Eng-land has nothing to do but look on. Austria is somewhat humbled, but relieved of a difficuluns whom she has so often beaten—yet on the very summit of her ambition she renounces. France has spent fifty million sterling, and 50,000 men, only to give Milan a Piedmontese instead of an Austrian master, and Predmontess instead of an Alastrian master, such ostablish the Pope in a temporal dignity even beyond his imagination, and capable of extension. Is all this real? The Emperor's game must be a very long one.

best thing he could do under the extraordina circumstances which surrounded him: threatening attitude of Prussia; the mediati influences of England; the disinclination Russia to sanction an appeal to the Hungari nationality; and last, and most embarrassis the complication in which the position of tPope, as a temporal sovereign, involved hi As for his mission regarding the freedom of Italy, his diplomatic combinations with Kossu and the other Hungarian leaders, and the fut prospects of Garibaldi and his yolunteer legio—these are matters which time must expla and develope. The news did not transpire in London till af-ter the official closing hour for Corsols, so that its full effect is not known; sales were made late its full effect is not known; sales were made late in the day at 196. The Daily New city article says that the Funds on Tuesday opened quiet, and business remained stagmant until about 2 o'clock, when Consols were quoted i per cent lower than on Monday; influential buyers who are believed to act on good foreign information, then came forward, and by 3 o'clock a rise of i per cent had taken place; between 3 and 4 and at a still later hour, increased thoyancy prevailed owing to telegrams from Paris aunouncing an official declaration of Peace, and an advance of two per cent, in the Rentes. Consols finally left off three-fourths per cent, higher than on Monday, and seven-eighths per cent, above the lowest point of the day. The other classes of securities responded in the afternoon to the buoyancy of the funds. In the discount market, on Tuesday, the aupply of money was plentiful, and the

The steamship Norsh Briton, from Liverpool the 13th inst., reports of her trip as follows:

On Wednesday, the 20th inst., at 1:25 r. w., saw a large iceberg, and continued to see icebergs all the afternoon. At night a thick fog set in; we proceeded on our course very slowly. Soon after 2 o'clock, on the morning of the 21st, the fog cleared away, when immense icebergs howen sight in all directions. At about four o'clock the whole Atlantic ahead of us, as far as we could see, was covered with fields of ice, presenting apparently a perfect barrier to our progress westward.

The course of the ship was accordingly immediately changed to the south, and we steamed along in that direction until a passage was discovered through the ice, when the steamer was again headed westward. At one time, in the afternoon of the 11st, there were fifty-six icebergy in sight. We entered the straits of Belle 1sle at 6 r. M. on Thursday, and on that evening asw many iceberg in the Straits. The Peace is expected to stimulate commercial enterprise, and to lead to a higher value of money.

The tendency of the foreign exchange this afternoon, in some instances was rather adverse. Bills on Holland and Hamburg were quoted slightly lower. The principal demand, however, was on St. Petersburgh and Anstria, for which quotations considerably less favorable to this country were established. There was no alteration of importance in the produce market, but as regards sugar and some other articles, firmness prevailed. Silk market strong, it being anticipated the numerous buyers who have been deterred from operations by the war will now come forward.

The Times City Article says several large purchases took place, and Consuls speedily improved hearly one per cent.; the tendency in that direction being greatly stimulated by the fact that nearly all the speculators operating had been for a fall, and that there was, consequently, a rush to buy back on any terms. There were no bullion operations at the bank on Tuesday. The supply of money increases with the payment of the dividends; and the impression that the bank minimum may be reduced on Thursday assisted the founds in their upward movement.

(From the Tribune, 20th)

The Italian war is over. On the 8th inst. a armistice was, to the surprise of every one, corcluded between France and Austria. Three day afterward the two Emperors had an interview which resulted in a peace, of which the conditions would seem to be a death blow to all preent hopes of Italian independence. Fortunately the two citizens were not thorughly satisfied as to the credentials of the new comer, and followed him closely, or there is ittle doubt what would have been the result since a little later a policeman was found who took both the burglar and the pretended officer into custody before the latter could make off. It turns out that it was but the bold effort of an accomplice to free his "pal" from arrest, since the bogus officer was the same man that

EXTENSIVE ADVERTISING.—About two months since, Mr. Andrew Wind, General advertising Agent, of No. 133 Nassau Street New York City cause the first part of a story, writer by Dr. J. H. Robinson and entitled "One Eyed Saul," (which was to appear in a weekly paper of that time published by Amor J. Williamson,) to be published in over 500 newspapers, the cost of which amounted to \$15,350.

We perceive by our exchanges that Wind has been compelled to take legal steps against Williamson, towards the recovery of the amount and we trust he may succeed, as it is too hard for any one to suffer so outrageous 7. LOCAL MATTERS.

But this they have not done The settled principles of the government is relation to slavery were subvorted,—its entire changed from that being merel of policy was due solely to Mr. Dougle -Nebraska bill was in violation o every preceding compromise on the slavery question, and directly at variance with the setquestion, and directly at variance with the set-tled policy of the government. It took the control of the Territories out of Congress, and gave it to a pro-slavery Court. It paved the, way for the Dred Scott decision, and for re-opening the African Slave Trade. It inaugura-a system of outrage, of commotion, of lawless-ness and civil war in Kansas that has diagracgroomest page in our national history. What followed, everybody knows. The more patri-otic portion of the Democratic party in the free States abundanced it at once and forever; and in the Presidential election of 1856, instead of carrying fourteen of the sixteen free States, but tive of them gave up fealty to prin-ciple to preserve fealty to party. When Doug-Democratic party had twenty-one Senator from the free States to eleven Opposition its adherents in that body from those State are reduced down to seven, to twenty-five R ans. The that the economy that has been practiced for two years past must still be enforced, else the country's troutiles will not be relieved. The commercial cities of the Atlantic see-board are full of imported goods,—for the most part articles of luxury—and a market for a large portion of thom is confidently looked for in the West. We have before warned our readers who deal in general merchandise that the New York diummers are to be avoided; and we to day renew our exhortations, begging them to measure their purchases by the country a built to pay. They may be assured that the Mr. Woodman is not a politician, and his West needs and can take but an infinitesima are loaded down; and that the dealer in the interior of Illinois, Iowa or Wisconsin, who to relieve the farmers of the pressure meaning mortgages, to lift notes that are

or operating railroad property will find much to encourage them in these figures. We think thay go far towards demonstrating the dividend paying capacity of most of our American lines. Certainly we may, hope that with the economy of management learned in a period of unexampled depression, dividends may be doubled when the season of preospecify returns.

We have no perfectly reliable data to refer to; but we may usume without fear of serious error, that the cost of the roads of Illinois, Iowa and Wiscousia, are less than one half the sum

A Good Story Spolled. The felicity of the Democratic journals would be complete if they could find one nigger volun-tarily going back from freedom to slavery. As with a certain class of minds, one swallow is with a certain class of minds, one swallow is summer, one darkie choosing bondage rather than liberty would prove the entire rightfulness of the American slave system. Instances with-out number have been before the public in which it has been said that this unnatural 'swap, has been made, but when they are chased down, they somehow give out on the least quarter, and, like most demogratic stories, fail for worse of repentant slaves, tired of the laxury of owning themselves, and enjoying the fruit of their own abor, lately passed through that city, en route from Canada to Kentuck. But this like its predecessor, is doomed to be squeiched. In-quiry proves that the men and women had never been slaves at all. Will not the Democratic pa-

the laws of that session:

We can relieve the Register's uneasiness in this matter in one word. It appears that the electric of the House pasted the original resolution in their journals and sent a copy of it to the Scaate, which copy was likewise pasted in the journals of the Senate, and that was the end of the unster. The resolution never went to the enrolling committee, and consequently it was never sent to the Governor for his signature. This exprains exactly "what became of it," and "why it was not published with the laws of that seasion. The "auppression" was entirely owing to the enxisty of the Democratic clerks to save a little labor. Of course as the resolution was not placed by the committee among the enrolled laws in the Secretary's of Sec, it failed to be published in the volume of laws. We do not one and that the resolution accessarily required the Executive signature, or that, because by the blunder of the officers of the House, it was not algreed by the Governor it was good for nothing; but being smothered in the voluminous pages of the legislative jour-

Is proved conclusively that slavery requires three acres of ground to produce a given quantity of agricultural products, where free labor requires but one, and that is demands a constant characteristic and that is constant change from old lands to new to main-tain even this relative position as a producing power. It showed that the labor system of the an even this relative position as a producing power. It showed that the labor system of the Southern States is confined to one department of industry, to wit, agricultars; and that even in that department, though sided by cheap land and a generous soil and climate, those States, all behind their Northern competitors more than one hyedred millions of dollars per aumino—with many other facts equally convincing and equally alarming to statesmen and patriots. souri Democrat writes that paper unider date of July 1st as follows:

The topic most talked of recently is a personal difficulty between Hon. David C. Broderick and D. W. Perley, an Englishman and iswyer of this city. It appears that at the late Democratic Convention Judge Terry made a speech, in which he pitched into Broderick, severely. Latterly, at the breakfast table of the International Hotel, Broderick spoke his opinion freely of Terry and characterized him as a blackguard. Perley happened to hear him and said that Terry was a triend of his and he would not allow such language concerning him to pass unnosuch language concerning him to pass unno-ticed. Broderick asked him if he endorsed what Terry said; Perley evaded the question and said that his friend must not be abused; to which Broderick replied, that Perley was no better than Terry, and moreover, if it were not for the presence of ladies he would "wring his neck." After several days' delay, Perley persus. H. Brooks (an F. F. V.) to carry a challe

ght, especially as he could not recognic nation receiving a challenge through order receiving a challenge through order receiving to the second received intention to take no notice of pers-salts during the political cameaign, h nd wifting to defend himself from persons ack, and it will be well to let him alone.

The anti-tecomptonites having failed of fusion, are in the field with a full taket, and it is slogether a strong one. D. R. Ashley, nominee for Treasurer, has declined. Though Mr. Ashley laish from Texas, and has been, recently, a Broderick Democrat and American, he leans a full manner.

The Harmonious Democracy-files shed at Charleston Predicted. The New York correspondent of the Buffalo Republic, the leading Douglas organ of Western be the result of the Charleston Convention :

prehensions, thus indicates what he thinks will be the result of the Charleston Convention:

"Now, how can Douglas men go to a city, when, in advance, public sentiment has been so uncourteously expressed towards their chief? Calling the Convention at Charleston was a "sprat" to catch a "herring," but the herring won't be cample, won't be even directly civil. If the Convention met in 'Charleston and its members express Douglas sentiments they will be insulted, shot down and overward. It do not think that the lives of Douglas members would be safe, not on account of a maddened, excited population. The Mercury on the ascembling of the Convention would stigmatize the Douglas delegates as Abolitionists. This would be enough to draw down upon such men the rengeance of the mob, and all men who voted for Bouglas or talked Douglas would be murdered, and this is the more probable as there is no law in Sutth Carolina to punish the murderer of Abolitionists.

If Douglas delegates go to the Convention at Charleston, their friends must go with them for protection to the extent of 10,000 Douglas men, armed and ready to resist the assaults of a Charleston, and such speakers as Bouham and Rhett, who would look upon the killing of forty or fifty Douglas men with as much composition meets, I ask you what show Douglas men will have when the Convention meets? I will be overswed, Douglas menbers will be shot down in the street, and any thing will be done to will have wass me Convention meets? will be about over in the street, and anything will be done to ease his freudes, reb him of the nomination, and give it to some Southern Fire Enter, and when this is accomplished, then these mad men south, will laugh and checkle over their victory.

The National Convention of Christia: Associations in New York. Associations in New York.

On the third day of the Convention the question was where the next Convention should be seld. The New York Express had a correspondent pre-ent from whose report we quote.

The question desiding where the next Convention should be held being made the special order, a most amusing debate ensued. Invitations had been received from New Orleans, Louisville, St. Louis and Chicago, and it was evident that the choice by between them. The committee reported in favor of Louisville, as becommittee reported in favor of Louisville, as beevident that the choice lay between them. The committee reported in favor of Louisville, as being the most central and appropriate, but it had only a few advocates. The delegate from St. Louiss said that it (Louisville) was a most excellent place to immigrate from, and that the best way to do Louisville good was to meet in St. Louis. The brother from Chicago argued that his city was the most convenient, for all that one would have to do, would be to get apon any railroad and tell them to drive shead, and they would be sore to come out at Chicago. railroad and tell them to drive ahead, and theywould be sure to some out at Chicago.

New Orleans had the most able advocates
who plead carneatly for the Convention to meet
there. They said their President arged them to
come, and assured them that he had a daughter
which he would give to any one of the delegates
if they would only cause to New Orleans; besaides, he thought New Orleans much more full
of wickedness than Chicago, and therefore needed much more the Convention to meet there
and revivity the place. So many were the salvocates for New Orleans that the previous question was ordered, unleas some had, a place to advocate not yet spoken of. A member for New
Orleans then go up and advocated in a very in-

where, it must in due time disappear from American society as it has disappeared from other nations. The necessary condition of the passage from barbarism to civilization, it must go out of existence whon the necessary for it is ever. Then it becomes an obstacle instead of an auxiliary to progress and cannot be preserved without evi consequence. The difficulties connected with its removal, will be mustained, be obviated and smoothed away by the peculiar political constitution of the American propie, which leaves the subject to the ladependent decision of the people of each State, and thus Missouri, South Carolina, and the other States can act upon it such for hereelf. As for the requesting of the African slave trade, Mr. Skanton does not believe that the people of the Sout can ever hesitate "between the policy which which would ill] our country with white meal; can ever hesitate "between the policy which which would ill our country with white men, or that which men, or that which men, or that which men with the men and a furious." With regard to the disputed question in the Territories, he contends for leaving it there as elsewhere to be settled by the people-weven if this be not a matter of absolute right, he urges, "it is a small concession to be made for the sake of peace and harmony. Especially in it misguificant, in view of the great historical facts showing the gradual tendency of slavery. (From the Paris correspondent of tag Dally News.)

Sale of the Lawrence (Mass.) Machine Shops, &c..

The Lawrence (Mass.) machine shops, foundry, with water power on the Merrimack, fitty brick dwelling houses, boarding house, agent's house, &c., were sold on the 23d inst. for \$163, 500. Gen. James Dans, Mayor of Charleston, purchased the machine shops, foundry and water power for \$107,500. The dwelling houses were sold to different individuals at less than half their costs of the improvements.

The entire property disposed of is said to have cost over \$1,000,000; and although it only brought \$163,950, the sellers were evidently quite well satisfied with the result.

Work in the machine shop has been suspendad for several years past. It is not known with certainty what business will be transacted there hereafter; but it is suggested that the United States Government designs securing the property, to be used as an armory.

in the Convention, when they do, as the subject before them does in the Committee. The busis for their work is necessarily somewhat uncertain. There was a provision by law for a registration of voters and an enumeration of inhabitants. In about two thirds of the Territory this has been done, but in the remainder, owing to imperfect organization, or no organization, no registration could be made. When I say two-thirds, I mean as to population, for by surface there is not much more than a third of Eastern Kansas, or that, included in the State boundaries as proposed. By the registry and an approximation of the remainder, it would appear that the State, with the boundaries as proposed, which includes all of the settlements cast of the gold region, has a population of about one hundred thousand.

The sugro again came up—dragged up by the Democracy. It was that negroes and milattoes should never be permitted to live within the State. The vote on this motion stood, uyes 20, noce 28. I do not think that any black law, or proposition fo submit a black law, will go through this Convention.

There is a large amount of electioneering and feeling about the location of the temporary seat of government. It will be boxized by a vote of the people permanently, but that cannot occur for at least one year, and the temporary location will probably be for three or four years. The principal river points are Lawrence. Topela, and Atchison, shibough there is not some probability that it will go to the laster. The feeling between the L. wrence and Topela men is greater than I expected.

By this time, we had stopped running and fatigu into a leisurely walk, when those in the chaise, who were touchingly sympathetic, consolingly shouted to us that we were certainly lost, as the Austrian dragoons were slashing their way right and left, directly in our rear. This decided us to quit running altogether, as it was quite hopeless to run away from pursaing cavalry.

This reiaxation of our pace, and the recovery of our wind induced a cooler view of the whole affair, and we were already beginning to see its farcical character, when our cowardly coschman came puffing and blowing behind as his face swelling with fear and red with heat. be almost a failure. Many fields in the northern part of Illinois are hopeleasly lost, while others will yield an exceedingly light crop. The weather, however, has been very favorable to the harvesting of spring wheat, oats and barley; and one week more will probably see these crops all out. The quality of the spring wheat is about the best ever produced in the Northwest; and while we cannot say that the crop will be large, there is evidence sufficient to justify us in prodicting a fair yield. The oats also promise to be there is evidence sufficient to justify us in pro-dicting a fair yield. The cats also promise to be of fine quality; but the crop is small. The bar-ley will be better cured than the two previous crops; and from the samples sent in during the past week, we may expect a good crop. The corn crop looks well; but if the drought con-tinues much longer; it must suffer.

At the close the market showed more activity than throughout the day, and Standard Spring closed at 53c. Flour was dull and unchanged. Corn opened at 57c for No. 1; but owing to an urgent demand, holders became firm, and the market remained very stiff at 58c—showing an advance of 2@3c on yesterday's prices. About 18,000 bushels changed hands at 59c for Canal afloat; 57@55c for No. 1 in store; and 50c for Rejected—the market closing firm at the outside quotations. Oats were heavy, with sales at 25@25c—closing weak. Rye more active at 50c. Nothing doing in Barley. Highwines, 21ic. Provisions inactive, except for Bacon Hams, which are scarce and in good demand. Wool firm. Hides active at previous prices.

New Oars.—Messrs. Davis, Pope & Co. received this morning the first consignment of torsheing deterred by rumors of 'hesting' in the warehouses, confined to the new crop, the purchasers being millers—the market for which has declined 156317c per bushel. There is no inquiry for old Winter grades, and the only just suported was of No. 3.Red at 76c, on track in bugs. the close there was no disposition to buy any considerable lots unless at even decidedly lower rates. The stock in store of all kinds is not heavy—not exceeding 120,000 hushels. The requirements of the trade, however, at present are moderate, the arrivals of new wheat being nearly sufficient to supply their immediate wants. Sales of the west, 45,000 bushels. Rye has been inactive and dull, closing nominal. Corn—The buoyant feeling manifested in the corn market during the early part of the week, has been lost, closing dull and heavy. Outs continue heavy and dull. Barley constnues without change and nominal.

TOLNDO, July 23.—Receipts 250 bbls flour; 1,005 bu wheat. The Rade says:

The market is very bare—no wheat offering. Farmers in the interior, though they have harvested an abundant crop, refuse to sell—many of them declaring that they will pay their debts at the end of an execution, rather than submit to present rates.

We have no operations in Wheat or Flour—the latter we quote at \$569.55. One lot of 1,300 bu Mich, Scuthern Corn sold this morning at 70c.
